

# AMG BRASIL WINS EXCELLENCE AWARD

AMG Brasil wins 23rd Excellence Award of Metallurgic Mining Industry

## THE AWARD

AMG Brasil- Critical Minerals unit – received the 23rd Excellence Award of Metallurgic Mining Industry with the project “increase metallurgic recovery in concentration by spodumene flotation process through residence time in cleaner circuit”.

The project awarded was idealized by the Specialist in Flotation, Carlos Gusmão, Production Coordinator at the time, Luís Parreiras, production leader, Giancarlo Teixeira, and the Production Analyst, Marcos Pantaleão. This innovation has been implemented for a certain time and shows satisfactory outcomes as cost reduction and production optimization in Spudeme plant.

Fabiano Costa, AMG Brasil President and CEO, feels proud with another achievement by AMG and considers the award as an important acknowledgment of the company efforts in search of ongoing improvements and innovation.

Organized by Revista Minérios & Minerales, the award event will take place in September, in Belo Horizonte, and is formed by an independent jury comprised by specialists in mineral industry.

Besides, the event will receive mining technical and managerial staffs, which will interchange their experiences in searching for lower costs, processes optimization and greater productivity.

**We congratulate everyone for this new achievement!**
